

How to View Student Responses to TurningPoint Polls

Introduction:

This tutorial will demonstrate how to access an individual student's clicker response report sheet. In the report sheet, you will be able to view the specific answers a student selected during a session. This functionality provides backup documentation of the student's polling habits.

Note: This option is not available if polling is done in Anonymous mode.

- 1) Open the TurningPoint polling environment and import the necessary session. Please see our tutorials titled "PowerPoint Polling for PC", "PowerPoint Polling for Mac", or "Anywhere Polling" at frc.ua.edu for instructions on how to import a session or participant list.
- 2) With the desired session highlighted, click on the Reports button.

- 3) At the top of the right sidebar, click on the Results By Question drop down menu. To view individual participant responses, click on Results By Participant and toggle the Answer Choices checkbox.
